

## Benefits

### Increases Sales

by making it easier for your customers to place their orders online 24/7

### Starts Selling Immediately

by allowing you to setup your eOrder B2B store with just minor adjustments to the template

### Reduces Your Selling Costs

by providing online sales and pricing up-to-date information, minimizing the time your employees spend on the phone with customers, taking and tracking their orders

### Improves Inventory Management

by allowing you to easily adjust pricing, tracking back orders and making sure your business can sell, and replenish stock while at the same time controlling costs and satisfying customer demands

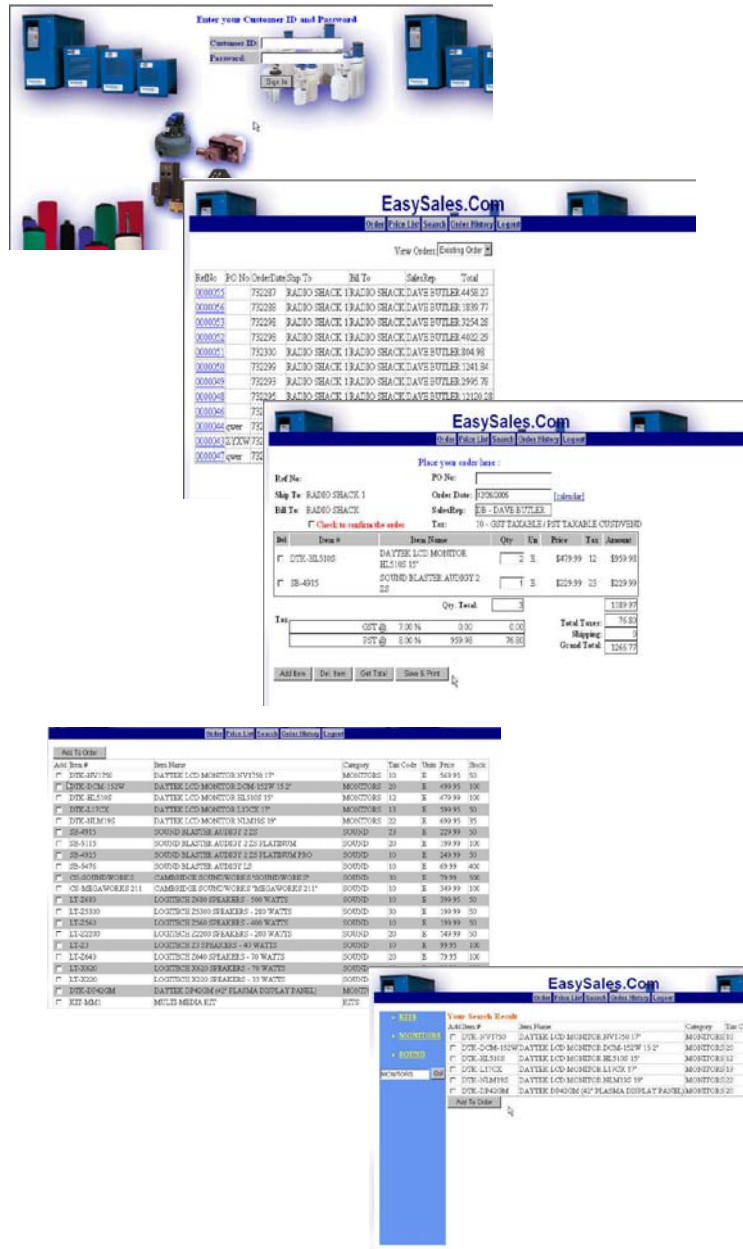

### Improves Customer Satisfaction

by saving them time and money with an easy to use B2B store that provides accurate order information

### Improves Order Processing

by integrating automatically with eWholesale, where Online orders become part of the regular order processing flow as they are received

Empower existing customers by allowing them to place and update orders via a simple and yet comprehensive business-to business Internet web store, saving them time and increasing the accuracy of orders.

## Features

### Order Entry Online via the Internet

eOrder allows customers purchase items via the internet when it convenient for them

### Secure Access

A User ID and password provide secure access so only authorized customers can place orders and may view their individual inform pricing and history on line

### Online Order History

eOrder allows customers to view their order history online, eliminating the need for them to call customer service representatives.

### Individual Customer Pricing

Customers have access only to the pricing levels you create for them, giving your customers a consistent shopping experience every time.

### Easy Product List Maintenance

Products added to your Product File, are automatically load to your web store.

### Fully Integrated

eOrder is fully integrated with a seamless single-database with eWholesale, which allows your online orders to move directly into order entry processing. It also means that all customer and prod information and pricing is always up-to-date.
