

## Benefits

### Increases Revenues

by placing all the information your sales force needs in order to place Sales Orders speedily and securely.

### Reduces Operating Costs

by releasing customer service personnel from entering, the sales force generated orders, and constantly answering "just checking" questions.

### Improves Customer Satisfaction

by ensuring a sales force that is well informed and with the tools to offer timely and accurate service.

### Maintains Your Information Secure At All Times

by allowing you to control who will have access to the information, and by reviewing submitted orders before updating.

### Enhances Customers Sales Experience

by providing the sales force with Item look-ups with images and other attachments.

### Reduces Maintenance and Training Costs

by being easy to install, maintain, and learn, eRemote reduces maintenance costs.

Empower your sales force with **eRemote™** to securely place orders via email, review their customers order history, pricing levels, credit information, and inventory levels, all this without the assistance of on-site employees. Give them the power of presenting your products through images and information documents stored in the product lookup.

The use of eRemote Options such as Range Records allows you to limit the Inquiry to specified records.

The Order History window is used to give the salesrep an overview on the status of submitted orders

Reference	Order #	Type	Status	Date	Sls	Shp To	Name	Bill To	P.O. Number

## Features

### Streamline Order Entry processing

eRemote allows the salesrep to submit their customers orders via email without involvement from your in-house order desk

### Avoid costly "just checking" calls

eRemote allows salesreps to receive timely updates on customer order and credit status, eliminating the need for salesreps to call office constantly to check on this information.

### Secure access and maintenance

eRemote allows head office to send security updates to restrict or grant access to salesreps as needed to maintain security over customer information.

### Quick product look-up

eRemote allows salesrep to quickly view product pricing and quar information.

### Review orders prior to processing

eRemote allows head office to review submitted orders prior to being processed into the main order file.

### Fully Integrated

eRemote is fully integrated with eWholesale, which allows your customer orders to move directly into your sales order processing after a quick review. It also means that all customer and product information is always up-to-date.
