

eShip

Benefits

Increases Productivity

by combining invoice entry with the shipping process, and giving employees integrated tools required to make shipping fast and easy

Eliminates Costly Entry Errors

by retrieving package tracking numbers and freight costs automatically from your carrier's software.

Saves Time and Increases Efficiency

by adding the ability to print tracking number information on your invoice, your customer can track his own packages without having to call your sales desk; or you can click on the stored tracking number for a detailed view of the delivery status from the carrier's web site.

Improves your Profit Margin

by using eShip to enhance the efficiency of the shipping and sales desk departments providing them with the tools to release orders quickly and efficiently without loosing track of shipped orders. eShip is an application designed to eliminate the need for manual paperwork, save valuable time for your shipping department, and operating costs to your company.

eShip integrates with common carrier standard software so that shipping rates can be obtained, shipping labels printed and courier pickups arranged as shipments are being staged directly from eWholesale $^{\text{TM}}$.

eShip stores the courier tracking numbers and provides easy access to delivery route status and proof-of-delivery information from the eWholesale™ invoice inquiry screen.

The carrier company's default information is automatically displayed, and you may change as required for each shipment.

You enter the number of packages in the order and their weight, and the information to the carrier's software.

eShip retrieves the Tracking Number and the freight costs into the invoice. Clicking on the tracking number takes you straight to the carrier's web site for a detailed description of the delivery route.

Features

Automatically integrates with carrier software

eShip integrates seamlessly with major carrier shipping software, sharing and retrieving relevant shipping information.

Avoids data entry errors

Sharing information with the carrier software, allows for accurate printing of bar-coded labels, recording of tracking numbers and freight costs.

Easy to setup and implement

eShip uses information from the Customer File, Invoice File, and the eShip Defaults Setups.

Quick look-ups and drill-downs

Quick look-ups and drill-downs allow you to easily keep track of shipments. Clicking on the tracking number takes you straight to the carrier's web site for detailed description of the shipping route.

Fully Integrated

eShip is fully integrated in a seamless single-database with eWholesale, and works closely with your carrier's software allowing your orders to be shipped and shipments tracked from within eWholesale $^{\text{TM}}$
