

**Better Living Products International Inc.** is a private corporation founded in 1994, based in Vaughan, Ontario, Canada, just north of Toronto. The company manufactures and distributes the world's finest assortment of Shower Organization products, such as, their signature line, **The Dispenser™**.

With distribution to more than seventy countries and through leading retailers everywhere, **Better Living Products** are available virtually any place on earth where shower dispensers have a market. The company is proud that its products are offered to consumers through the leading retail chains and specialty stores in the area of Bath, Home Improvement, Plumbing, Hardware and catalogs throughout the world.

After having used Vigilant accounting software for many years, the company felt that it had outgrown this system. The company needed a more flexible package able to integrate with its EDI and shipping partners. An attempt to adapt Sage's Accpac for this task has unfortunately failed. After an extensive search **Better Living Products** purchased **eWholesale** from **MIS Inc.** in 2007. Since then, the company has successfully implemented eWholesale's order fulfillment and shipping integration modules, which allow Better Living Products to receive EDI orders, pick and pack them, process the shipping information, print shipping labels, retrieve tracking numbers, and send EDI invoices and ASNs to customers.

**Better Living Products'** has greatly improved the efficiency of their order processing, while at the same time managing their inventory, and controlling daily tasks, such as sales, purchasing, receivables, payables, general ledger, and multi-level customer pricing.

Since purchasing eWholesale and its integrated options, **Better Living Products International Inc.** has developed a close working relationship and trust with their new IT partner, **MIS Inc.**

**"All our expectations have been met with eWholesale™ software, and MIS Inc dedicated support".**
